

INSTALLATION GUIDE

RESYSTA FENCE SYSTEM

The Materials

Resysta fence is extremely resistant to outdoor / exterior influences and is 100% recyclables.

Resysta fence really looks like premium wood. Our product is distinguished by its unique structure, making it very solid. Its permeability makes it resistant to decay and all-weather conditions. Unlike wood, Resysta fence does not grey and its color fades minimally.

Once installed, your terrace will require a minimum of maintenance for a maximum of years, it is a real ecological alternative to tropical wood products.

Its use is mainly recommended outdoors for a terrace, around a swimming pool or a jacuzzi, etc. - where thermal and environmental constraints are extreme.

Resysta Fence Materials Strengths

Product Properties

- UV resistant
- Weather resistant
- Resistance to chlorine
- Resistance to insects and fungi / mold

Installation

- Easy installation
- Complete system components
- Easy to refresh color

Surface Quality

- Texture identical to wood
- No splinters
- 30 color to choose from

Durability

- Will not rot
- 100% recyclable
- Easy maintenance

Scope of Delivery

NO.	PRODUCT NAME AND SPECIFICATION	ISOMETRIC VIEW	SECTION VIEW
1	RESFP010608 3/4" x 6-3/8" x 93-1/2" Fence Profile		
2	RESFI123408 3/4" x 9/16" x 93-3/4" Profile Insert		
3	RESFPB11416 16" x 1-1/4" x 6" x 1/2" Fence Post Base		
4	RESFP04040 3-3/4" x 3-3/4" x 72" Fence Post with Insert Profile		
5	RESFB3411208 3/4" x 1-1/4" x 93-3/4" Fence Bottom Rail		
6	RESFT3411208 1/2" x 3/4" x 93-3/4" Fence Top Rail		
7	RESFC0404 3-3/4" x 3-3/4" Fence Post Cap

ISOMETRIC VIEW

Step 1

To install the fence, first verify the floor level and the design or layout of the fence. Next, securely install the RESFPB11416 fence post base onto the concrete base using a recommended M10 bolt with a washer. Ensure that each fence post base is positioned 96" apart at the center.

Step 2

Insert fence post RESFP04040 into the RESFPB11416 fence post base.

Step 3

Ensure that you create both top and bottom holes on the fence post RESFP04040 and the RESFPB11416 fence post base. The holes will be drilled on-site to meet the specific conditions of the project.

bolt and nut

Step 4

Install the fence post RESFP04040 along with the fence post base using 1/4"-20 x 2" bolts and nuts. Fasten them in both the top and bottom holes, making sure the bolts extend through to the opposite side of the fence post groove.

Step 5

To ensure the proper installation of the fence board and minimize the post groove opening, simply slide the fence insert profile into place where the board will be installed.

Step 5

To install the fence bottom rail of the fence, gently slide it into the groove with the fence insert profile of the RESFP04040 until it reaches the fence post base.

Step 6

After you've installed the fence bottom rail, you can move on to installing the fence profile RESFP010608. To accomplish this, just slide the fence profile RESFP010608 into the grooves where the post fence insert profile is positioned. Ensure it is aligned with both fence posts until it fits securely against the fence bottom rail.

Fence Installation on a Slope

When dealing with a gradual slope, consider using a stepped fence method. This approach allows you to follow the terrain while maintaining a fairly consistent gap at the bottom of the fence. In this design, each fence panel between the posts is adjusted higher or lower than the adjacent panel, conforming to the land's slope.

STEP 1 - In the change of the ground height, use a leveling line to determine the exact elevation of the fence post insert, then cut it accordingly. This fence post Insert will act as the foundation for the fence bottom rail. After that, install the left-cut fence post insert, ensuring it is positioned in a reverse orientation.

SAFETY WARNINGS

Resysta is a Products do not present an inhalation, ingestion, or contact health hazard unless subjected to operations such as sawing, sanding, or machining which result in the generation of airborne particulate. This product contains crystalline silica. Respirable crystalline silica limits are specified by OSHA. Exposure to respirable (fine) silica dust depends on a variety of factors, including activity rate (e.g. cutting rate), method of handling, ventilation, environmental conditions (e.g. weather conditions, workstation orientation), and engineering control measures used. Exposures to respirable crystalline silica above limits established by OSHA are not expected during the normal use of this product. Crystalline silica, has been shown to cause silicosis and has been identified by the State of California, IARC, and NTP as a known human carcinogen. The risk of developing silicosis is dependent upon the exposure intensity and duration. It is recommended that a NIOSH-approved particulate respirator be worn whenever working with this product results in airborne dust exposure.

To view an additional information on our products, please refer to our Resysta website www.resystaUSA.com.
